EXAMINER

PWU, JEFFREY C

ART UNIT PAPER NUMBER

2143

DATE MAILED: 02/27/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

## Office Action Summary

**Application No.**

10/028,703

**Applicant(s)**

SHIM ET AL.

**Examiner**

Jeffrey C. Pwu

**Art Unit**

2143

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 10 November 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

- 4) ☒ Claim(s) 1-6 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1, 5 and 6 is/are rejected.
- 7) ☒ Claim(s) 2-4 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

### Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

### Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \* c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
  - ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
  - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- \* See the attached detailed Office action for a list of the certified copies not received.

## DETAILED ACTION

### *Title*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1 and 5-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Lavoie et al. (U.S. 2002/0143781).

Lavoie et al. teaches claims:

1. A method for transmitting state information in a client-server based networked virtual environment in which a plurality of client computers are connected to a server computer through a network, comprising the steps of:
  - measuring distances between a shared object and client avatars corresponding to the client computers in the client-server based networked virtual environment (paragraph [0062]; “ ... a method to define and update shared objects, wherein the updating of said shared objects is based

Art Unit: 2143

upon the distance between the local object and the remote objects within the same computer-generated environment”); and

- adjusting transmission rates of state renewal information from the server computer to the client computers according to the measured distances. (906; “a computer network configured to define and update data structures within a shared computer-generated environment, wherein a local instantiation 1001 of one of said data structures is known as a duplicate master 805 and updates remote instantiations 1004 of said data structure known as duplicas 804 according to distance-based Position History-Based Dead Reckoning 906. Said updating operation 906 according to distance-based PHBDR minimises the amount of data 1402 transmitted for the purpose thereof and the quality factor 1601 implemented according to an improved embodiment of the present invention dynamically maximises (1501, 1502, 1503) the usage made of the network bandwidth 702 available at any time” – abstract; also see paragraph [0047], [0090]-[0095], [0101], [0103], [0105], 0106], [0107], [0112])

5. A method for transmitting state information in a client-server based networked virtual environment in which a plurality of client computers are connected to a server computer through a network, comprising the steps of:

- checking whether a shared object varies in its state, and calculating an error value between a varied actual state value and a value predicted by a corresponding client computer if the shared object is varied in state; (paragraph [0086])
- measuring a distance between the shared object and a client avatar corresponding to the client computer using coordinate values; (1202; fig.12)

Art Unit: 2143

calculating a dead reckoning threshold value with the measured distance taken into account;

(1205; fig.12) and

- comparing the calculated error value with the calculated threshold value, and selectively transmitting state renewal information according to a result of the comparison. (method steps of fi.12; also see paragraph [0047], [0090]-[0095], [0101], [0103], [0105], 0106], [0107], [0112])

6. The method of claim 5, wherein said threshold value calculating step is performed in such a way that as the measured distance is decreased, the threshold value is calculated to be smaller, thereby increasing the transmission rate of state renewal information for the corresponding client avatar. (paragraph [0047], [0090]-[0095], [0101], [0103], [0105], 0106], [0107], [0112])

#### ***Allowable Subject Matter***

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Response to Arguments***

5. Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey C. Pwu whose telephone number is 571-272-6798.

Art Unit: 2143

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
